These interest earnings include interest earned on First United Bank Accounts, Schertz Money Market Accounts, Certificates of Deposit, and Texas Class Investment Pool.

#### **Investment Strategy**

In accordance with the Public Funds Investment Act, Guadalupe County Investment Strategies shall address the following priorities:

- Understanding of the suitability of the investment to the financial requirements of the County;
- Preservation and safety of principal;
- Liquidity;
- Marketability of the investment if the need arises to liquidate the investment before maturity;
- Diversification of the investment portfolio; and
- Yield

A portion of the operating portfolio will be used to invest funds in Texas Class Investment Pool and Money Market Funds. Available funds can be invested in highly liquid short-term Treasury Bills, Agency Discount Notes, US Government Bonds, and Certificates of Deposit with a stated maturity of thirty-six (36) months or less when their yield exceeds Texas Class or Money Market Fund Rates. The dollar-weighted average maturity of 365 days or less will be calculated using the stated final maturity dates of each security.

Guadalupe County will attempt to diversify its investments to help ensure the financial security and optimum liquidity of funds while achieving the maximum yield adhering to the County Investment Policy and state laws.

Monies will continue to be invested in a positive manner based on the cash flow needs of Guadalupe County. Investments are made with the intention of holding to maturity, but with the ability to liquidate should funds be needed at any time. As always, we remain focused on safety, liquidity, and then yield.

We will avoid speculative investing and maintain the highest professional and ethical standards as custodians of the public trust.

This report has been prepared in compliance with the Local Government Code 116.112 and Government Code, Subchapter A, Chapter 2256, Public Funds Investment Act.

#### DESCRIPTION OF INVESTMENT INSTRUMENTS

Descriptions of the different instruments are as follows:

<u>Certificates of Deposit</u> - A deposit of funds, in a bank or savings and loan association, for a specified term that earns interest at a specified rate or rate formula. CD's may be secured or unsecured. They may be for terms as short as 1 week or as long as or longer than 10 years.

<u>Commercial Paper</u> - Unsecured, short-term promissory notes issued by corporations for specific amounts and with specific maturity dates. Commercial Paper may be sold on a discount basis or may bear interest. Terms can be as short as 1 day and usually do not exceed 270 days

<u>Discount Notes</u> – Securities that do not pay periodic interest. Investors earn the difference between the discount issue price and the full face value paid at maturity.

<u>Fair Value</u> – the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a force or liquidation sale.

<u>Federal Agencies</u> – were created to provide credit to various sectors of the economy. They include the issuance of discount notes, coupon notes and bonds, and mortgage securities.

Market Value - the amount of which an instrument can be sold on a given date, prior to maturity.

<u>Money Market Mutual Fund</u> – are interest-bearing funds that invest in short-term investments so that the funds remain liquid and available to depositors. Such funds will normally include in their investment objectives the maintenance of a stable net asset value. The dollar-weighted average stated maturity of such funds is usually 60 days or less.

Par Value – the amount the collateral is worth if it's sold as face value.

Repurchase Agreements (Repos) – are short-term agreements to purchase securities and then, at a specified time, sell them back to the original party at the same price. Repos are agreements, not instruments, and transactions are generally subject to a Master Repurchase Agreement that stipulates the rights and obligations of the parties involved. The securities delivered are considered collateral and are usually treasuries, agencies, or mortgages. A stated "Repo rate" is the rate of interest that may be earned calculated on an actual-day month/360-day year basis.

<u>Treasury Bills</u> – are issued at a discount at an auction conducted by the Federal Reserve Bank. Bills may be issued in maturities of 3-months, 6-months, or 1-year. The difference between the face amount at maturity and the discounted amount paid by the investor is the income earned on the security. The market for treasury bills is the most active and most carefully watched sector in the world. Every other type of security trades at a basis spread over treasuries.

<u>Treasury Notes & Bonds</u> – are interest-bearing securities with a stated coupon rated issued at or near face value and redeemable at face value. Notes have maturities from 1 to 10 years and bonds have maturities from 10 to 30 years.
