

Close the Door Campaign

A closed door is one of the best pieces of firefighting and lifesaving equipment. It can:

- Reduce fire growth and spread.
- Limit damage to your home.
- Potentially save lives!

Close the Door!

- Close the bedroom door when sleeping
 - This simple action can help slow the spread of smoke, heat and fire.
- Close doors behind you when escaping a room/building that is on fire.
- Keep fire doors closed. Never wedge, disable, or prop open fire doors in apartments or other buildings.

Close the Door

If you can get out of a burning structure, get out. If you can't, put a closed door between you and the fire to buy yourself valuable time!
